**Measurement of the spring length while mounted:**

When the car stands on the ground (front/rear):

When car is on a lift with wheels hanging out (front/rear):

### Your requirements

Lowering in mm (front/rear): \_\_\_\_\_ or raising in mm (front/rear): \_\_\_\_\_

Stiffness (front/rear):  like OE  harder (in %): \_\_\_\_\_  softer (in %): \_\_\_\_\_

Technical documentation/test certificate necessary (extra charge):  yes  no

Special applications do not have a part approval! If a homologation is necessary, please check with your homologation centre prior to installation.

**When submitting your (original) springs be sure the completed form is in the parcel.**

Please note that the processing of your request is solely possible with the completed form. Following our examination you will receive a cost estimate, provided a production is technically possible.

Our general first examination /data acquisition is free of charge. Your consent /confirmation is required to have us produce anything.

**Outside Germany, please contact your importer (local dealer) for any queries and the handling of your suspension products. You can find a list of our importers here: <https://www.h-r.com/en/worldwide/>**
